IOT ENABLED DASHBOARD

REAL-TIME MONITORING.
SMARTER MAINTENANCE.

SELECT ACTIVITY

Choose the operation to be performed

INSPECTIONS

Service Inspection
Routine maintenance

CoF Measurement
Friction test

FIELD OPERATIONS

Remove / Reinstall
Machine movement

Grease Refill
Refill lubricant

Commission Machine
New installation

KEY FEATURES

AUTOMATED REPORTS FOR CoF, SERVICE & MACHINE HEALTH

Easily extract reports and make
data-driven decisions

- Commissioning Status with Active/Inactive counts
- Grease Consumption Statistics
- CoF and Service frequency
- Interactive monthly graphs for
 - Commissioning data
 - Removal/Refixing of GFLs due to maintenance activities
- Dedicated access for Division

GEOTAGGED MACHINE MAP

Each machine is
accurately plotted on a map

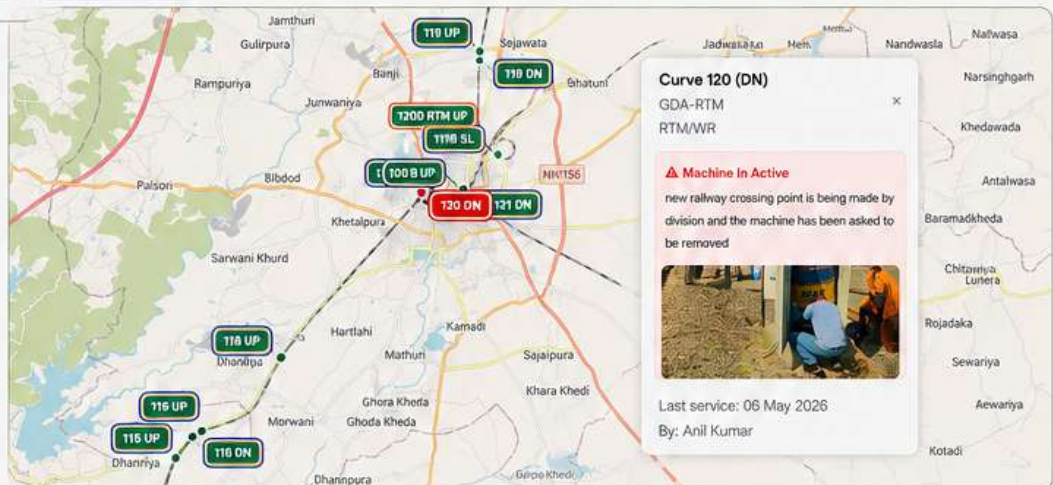

Clear visual indicators
for machine status

- Active (Green capsule)
- In Active (Red Capsule)

Each inactive curve
will have details around
the reason for being inactive

REAL-TIME INSIGHTS
Stay updated, always

DATA-DRIVEN DECISIONS
Plan better, act faster

OPTIMIZED PERFORMANCE
Higher uptime, lower cost

RELIABLE & SECURE
Built for railway operations
